	Examiner		Art Unit	
	Cloud K. Lee		3753	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 April 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1, 4-15 and 18 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1, 4-14 is/are allowed.
- 6) ☒ Claim(s) 15 and 18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/5/07 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dunnleder in view of Rjornsson (Patent No. 6,142,179).

Dunnleder discloses a fluid delivery system (Figure 5) comprising a storage vessel (6a), a first pipe work loop (from 20 through 6a to 10), the storage vessel is in fluid communication with the first pipe work loop, the first pipe work loop includes a first pump (4a and 4b) which urges fluid to flow in a first direction through the first pipe work loop at a first pressure and which follows a path of travel that returns to the storage vessel, a pipe work branch (11 through 2 to

Art Unit: 3753

15), wherein the storage vessel is being in fluid communication with at least one pipe work branch, the pipe work branch includes a second pump (14a, 14b and 14c), a branch manifold (2a, 2b and 2c is read as branch manifold) positioned in the pipe work branch provides a second pressure, an offtake (12) positioned downstream of the branch manifold (see figure 5), a first hose (2) is provided in fluid communication between the ranch manifold and the offtakes, a return manifold (between 43 and 15) in the first pipe work loop downstream of the first pump, wherein the fluid flows in the first direction through the return manifold and is returned to the fluid storage vessel when at least one offtake is closed, wherein opening of the offtakes opens the system to atmospheric pressure.

Dunnleder does not explicitly disclose the fluid flow in a second direction opposite to the first direction when at least one offtake is opened. However, the offtakes (12) are opening the system to atmospheric pressure, and the fluid is flowing in a second direction opposite to the first direction because of the work branch loop pressure that generated by the pumps (14a, 14b and 14c) in the system is much greater than the atmospheric pressure. Therefore, Dunnleder meets this limitation.

Dunnleder fails to disclose a fluid cleaning components.

Rjornsson discloses a filter (Figure 1 element 4). It would have been obvious to one of ordinary skill in the art at the time of the invention to have provided Dunnleder's device with a filter, as taught by Rjornsson, to insure the fluid inside is clean (Col 3 line 23-26).

Art Unit: 3753

4. Claim 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dunnleder (European Patent Application No. 0 594 020) in view of Hietanen (German Patent Application No. DE 198,26,696 A1).

Dunnleder fails to disclose at least a second hose.

Hietanen discloses a second hose (17) is provided in fluid communication in at least one offtake (see figure 2). It would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided a second hose in order to circulate the water when the offtakes are closed as taught by Hietanen (see pages 5 lines 3-10).

Allowable Subject Matter

5. Claims 1 and 4-14 are allowed.

Response to Arguments

6. In response to applicant's arguments that the amended specification recites the present application is a continuation of an international application and the priority claim has been changed. This is noted that, even the present application is a continuation of an international application, the rejection stands as set forth this office action because the publish date (or filing date) of Dunnleder, Rjornsson and Hietanen are more than one year before the priority date of the present application.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

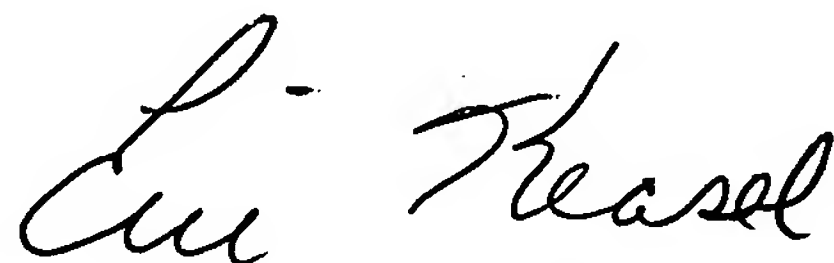

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cloud K. Lee whose telephone number is (571)272-7206. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eric Keasel can be reached on (571)272-4929. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
